## FRUIT TREES

Our Apple, Cherry, Peach, Plum and Pear Trees are standard first-class 2-year old stock, 3½ to 5 feet. This is all Western grown, acclimated stock ready for delivery and planting any time now. Order early and get your trees out while there is plenty of moisture. The earlier you get them out the less loss you will have.

**APPLES:** Varieties: Yellow Transparent, Early Harvest, Duchess, Wealthy, Maiden Blush, Autumn Strawberry, Grimes Golden, Delicious, Jonathan, Staymen's Winesap, Wolf River and Gano. **CRAB APPLES:** Hyslop, Red Siberian, Florence and Whitney. ## SEED NOTES

Practically all kinds of Field Seeds continue high with no prospects of lower prices this season. Some items are really scarce and will advance with the season. Buyers of large quantities should place their orders early or they may be disappointed in securing a supply.

**ALFALFA and CLOVERS:** Both continue scarce and high. Were it not for the arrival of some South with the exception of Hubam, are especially scarce and high. Hubam is in much better supply and lower than last year. We have good stocks of all the Alfalfa we list and will take care of orders at prices quoted as long as present stocks last. Note the purity, germination and low prices we are quoting; you cannot duplicate them elsewhere.

**TIMOTHY:** Prices unchanged, stocks are all in hands of the large speculating dealers who are in position to hold it at firm prices. Stocks are ample and we do not look for much if any change in prices.

**SUDAN GRASS:** This is one of the real scarce items. It is estimated there is not enough seed in the country to supply one-fourth the usual demand and high to higher prices the remainder of the season may be expected. Don't delay ordering or you may have to pay more money for it.

**OTHER GRASSES:** Blue Grass continues high with an upward tendency. The entire crop is in the hands of speculative dealers who will advance the price as fast as they can force it up. Other Grasses in fair supply and steady.

**OATS, BARLEY, WHEAT and CORN:** Oats are another one of the real scarce items, good seed stock is almost unobtainable. We have fairly good stocks of all we list which we will supply at prices quoted herein as long as our stocks last. Barley, Wheat and Corn are in good supply at steady prices. The failure of the Fall Wheat will undoubtedly cause an increased demand for Spring Wheat. We make a specialty of Seed Corn, and pride ourselves on the quality of our stock, which is all carefully selected, double tested and the best money and experience can produce. Ask for samples and special prices on large quantities.

**PINTO BEANS:** The market is easier but prices no lower. Manchurian Beans, similar to Pintos and equal to them in eating qualities are being imported now, supplying the consumptive demand at from \$2.50 to \$3.00 per cwt. below the price of Pintos. The few Pintos remaining in the country will be used for seed purposes at about present prices.

**POTATOES:** There is perhaps a slightly better feeling in Potatoes, but market is still badly demoralized on eating stock with but little hope of much improvement during the season. Good seed stock of good planting qualities is in good demand as everything points to good prices for the new crop as but few were planted throughout the south. It looks to us as if Potatoes would be the best money crop this season. We are Potato specialists; let us figure on your requirements. We have the stock and can please you.

**ONION SETS:** We are the largest growers of Onion Sets in the West, and every set we send out is Colorado-grown and we defy any one to offer anything better. Let your orders come; we will supply you the finest stock you ever saw.

**POULTRY SUPPLIES:** If interested in Poultry Supplies be sure and note our prices. We have large and complete stocks of the best money can produce.

**NURSERY STOCK:** Prices on some items lower and on others higher than last season. Everbearing Strawberries are especially scarce. So far have been able to secure only 100,000 of Western-grown Everbearing plants and when these are gone don't know where can secure more. If going to need any this season better order early. "First Come, First Served." Please bear in mind our complete line of Nursery Stock is all Western-grown and acclimated.

**GARDEN SEEDS:** There has been a heavy demand for all kinds of Garden Seeds, indicating an increased acreage in all kinds. The demand for Lettuce, Cauliflower and Peas have been the heaviest in history, insuring an extra large acreage of these throughout the Mountains. We are large shippers of these Vegetables in season and have large stocks of these seeds on hand for prompt shipment. All grown by specialists who have grown seeds for us for years and whose stock we can cheerfully recommend to the most particular growers. We mailed you a copy of our 1923 Catalog early in the season. If you failed to receive or have mislaid it, let us know and will send you another. It is the largest, most complete Catalog issued in the West and should be in the hands of every grower.

Let your orders come, we have large stocks, ample help, and will give you good stock and quick service. Trusting we may be favored with your orders, we are

Yours truly,

THE BURTON SEED COMPANY.

For Prices see other side.
